

# Club de Golf Le Parcours du Cerf - Parcours Faon

Longueuil, Québec, Canada

Project done with the firm Graham Cooke & Assoc. Inc.

**Project type:**

Renovation / 2-hole addition

**Client:**

AGAPARC

**Approximate cost:**

\$1,150,000.00

**Project objectives:**

Creation of two new holes, and partial modification of 3 other holes in order to create more room for a housing development.

Use the course as a buffer between the housing development and an industrial area.

**Services provided:**

Preliminary concept plans, Construction plans and documents, Consultation during the construction, Project management.

**Project status:**

Completed.

**DESCRIPTION:**

Perfectly integrated in its community, Le Parcours du Cerf was built in the early 90's as the centerpiece of a new vast residential development that allowed the city of Longueuil to expand in an area of the city which was previously undeveloped. Up until recently, some land parcels that were still unoccupied and bordered by industrial buildings were used by the club as storage zones. Substantial works were done to relocate two holes on those parcels in order to develop more home sites while still preserving the character of the original course.
